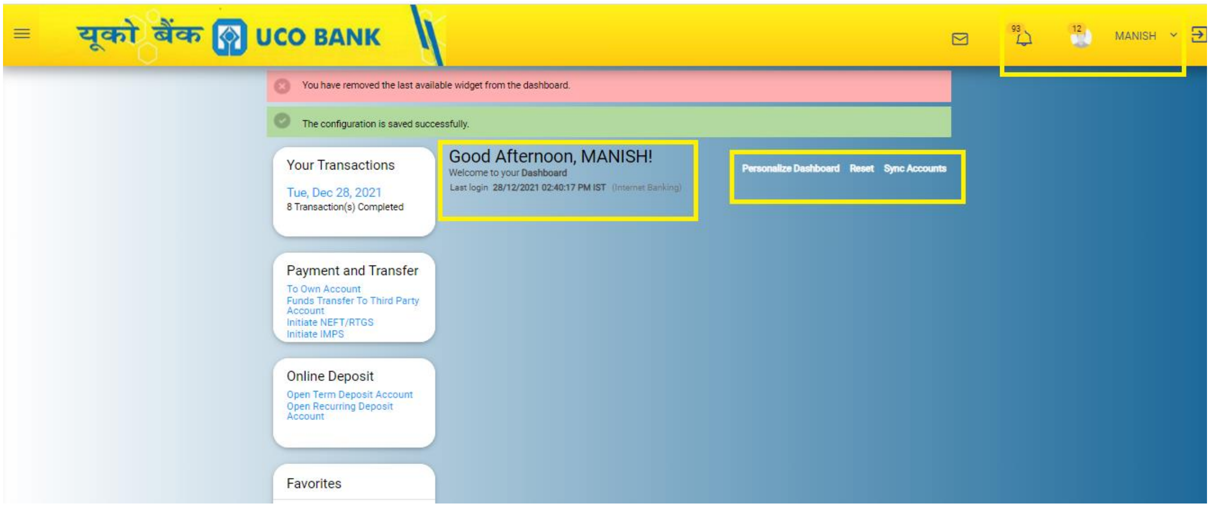
FEBA Dashboard

After successful login by Retail & Corporate FEBA users

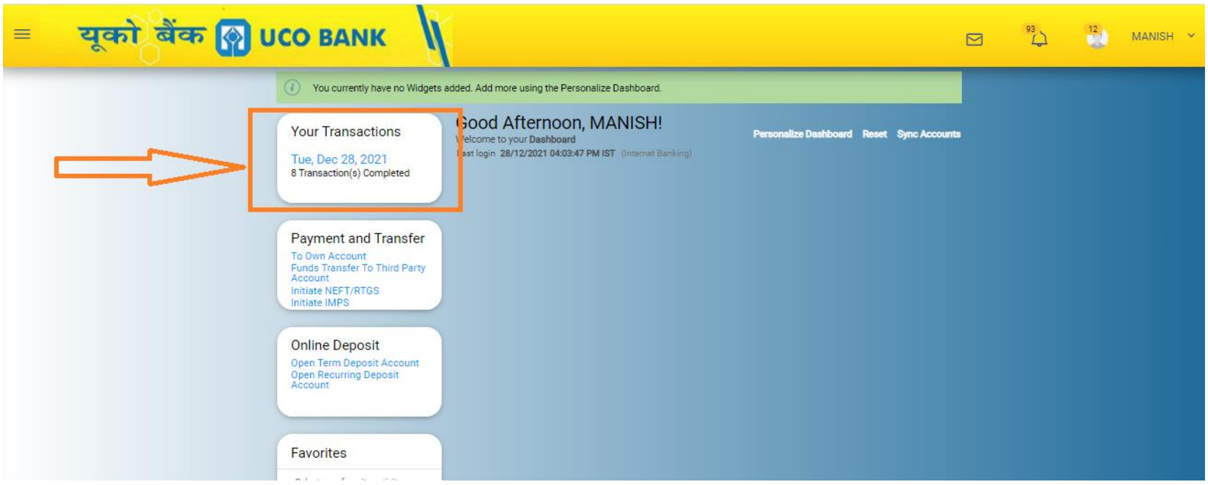
Dashboard will show to the users which can be customized according to the user's choice.



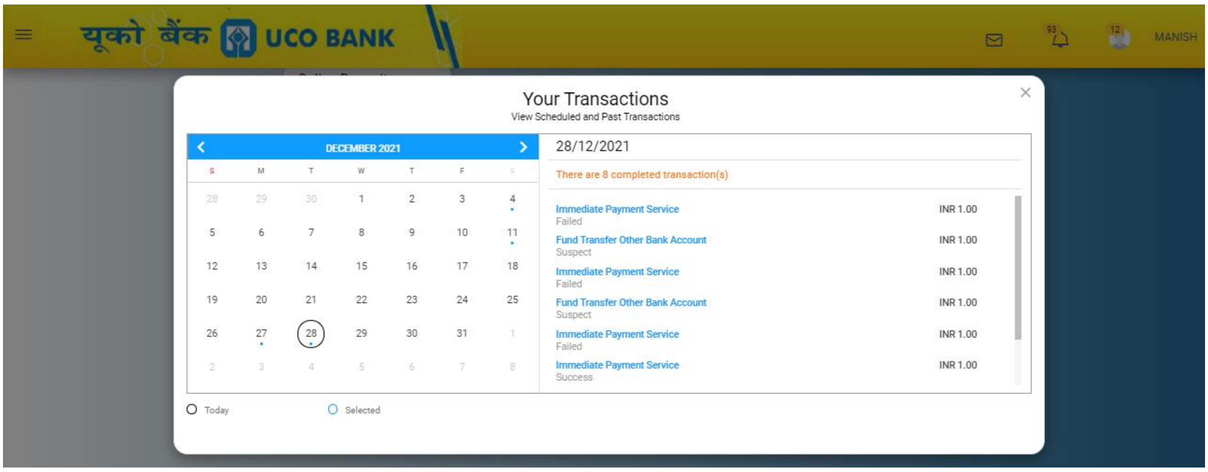
Following link or buttons available in the FEBA dashboard.

1. **Your Transactions:**

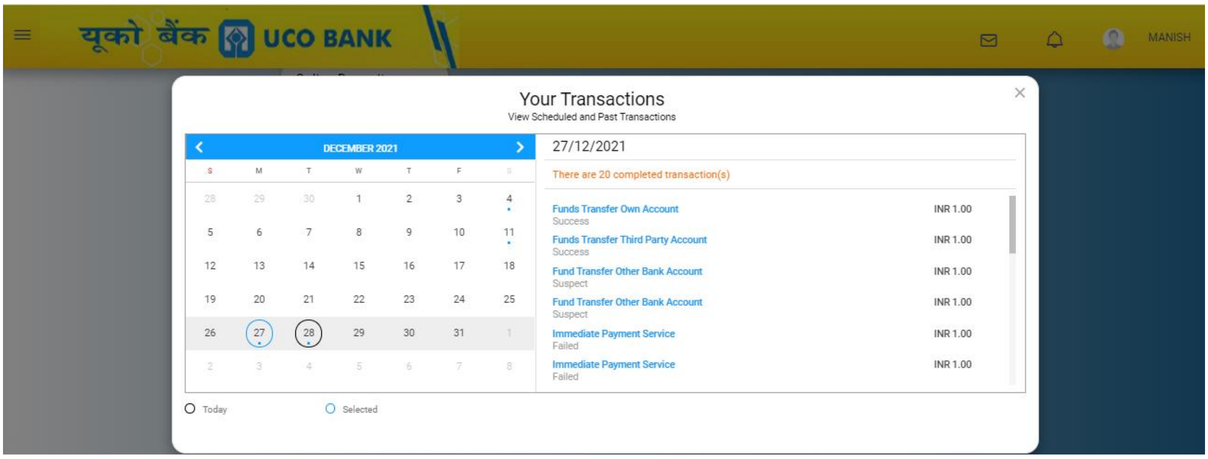
From Your Transactions users can view the details of the transaction done through FEBA as on date (current date) and any date. Transaction may be schedule or past transactions



On click of Date format, a pop-up window opens with details of transactions executed on current date



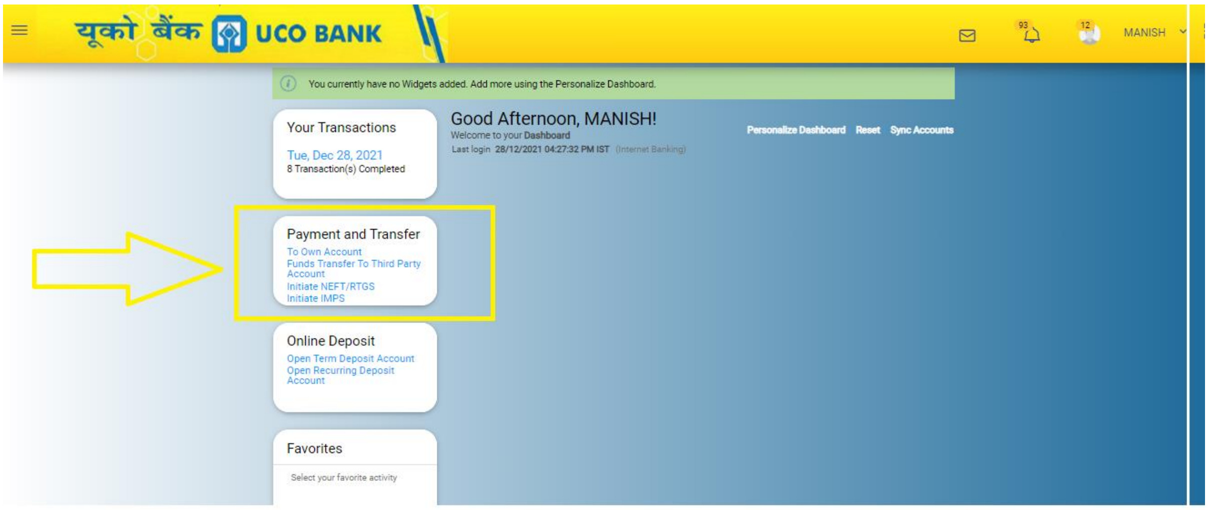
User can change the date from the calendar and view the details of transactions on the selected date too.



2. Payment and Transfer

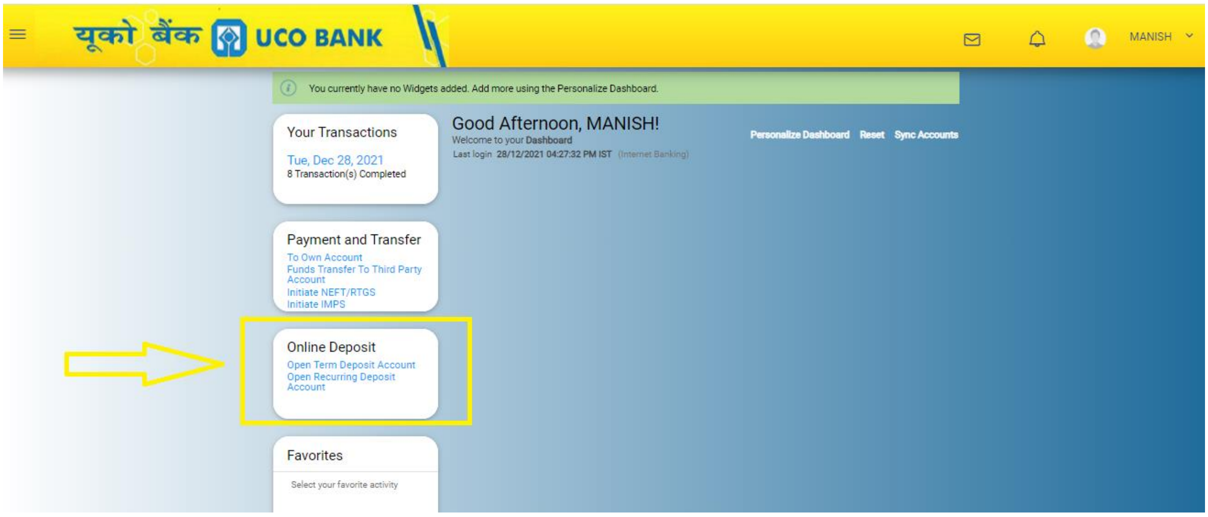
Four quick transfer links are available in the dashboard for payment and transfer widgets.

(a) To own account
(b) Fund transfer to Third Party Account
(c) Initiate NEFT/RTGS
(d) Initiate IMPS



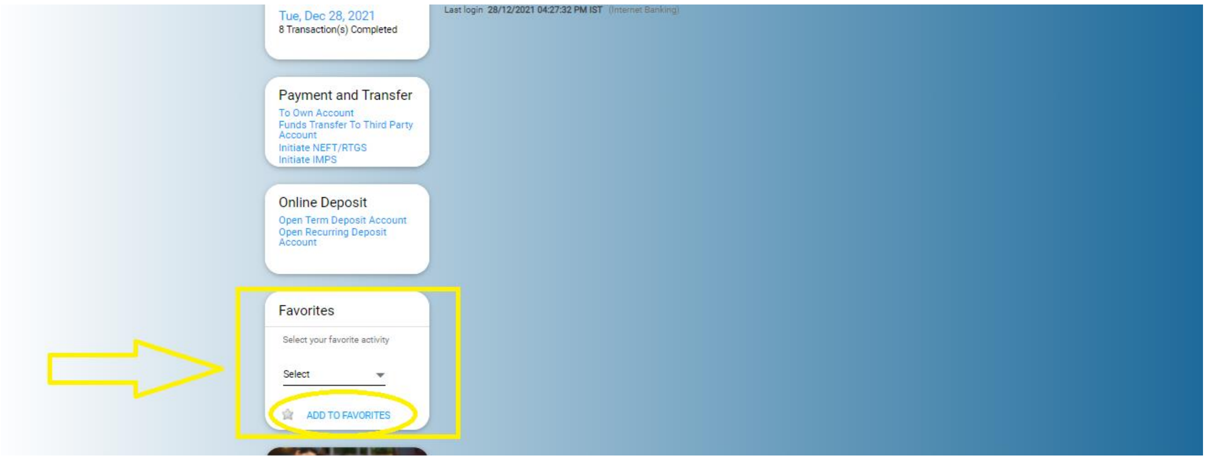
3. Online Deposit

Using online deposit, user can directly open Term deposit or recurring deposits.

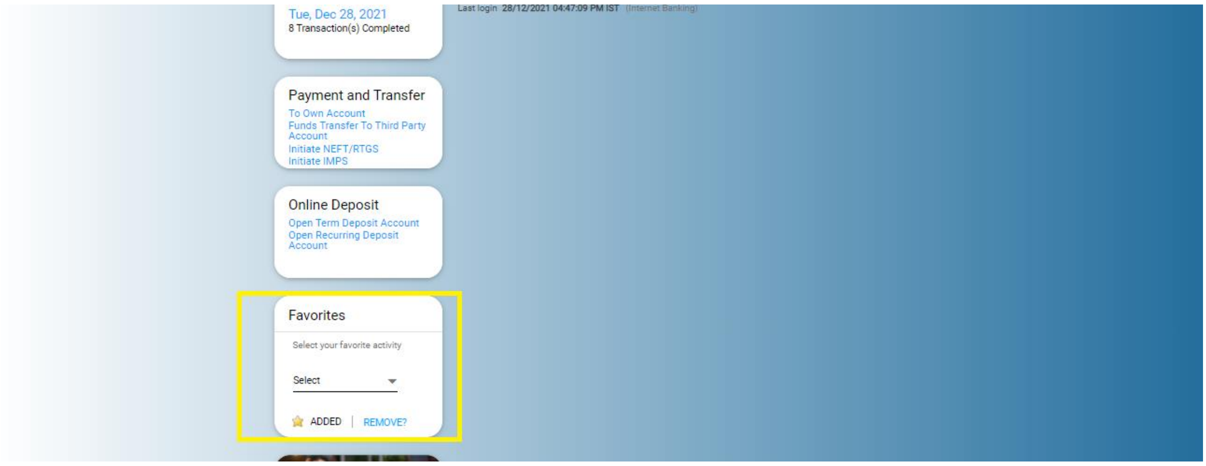


4. Favorites

Using this widget, user can add favorite's link to their choice.



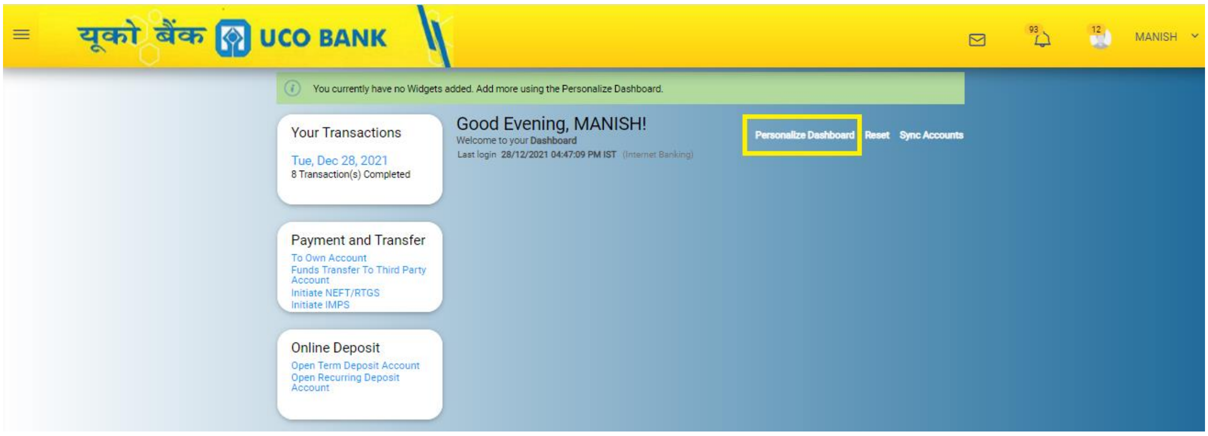
When user click on add to Favorites, two buttons ADDED and REMOVE will be enabled



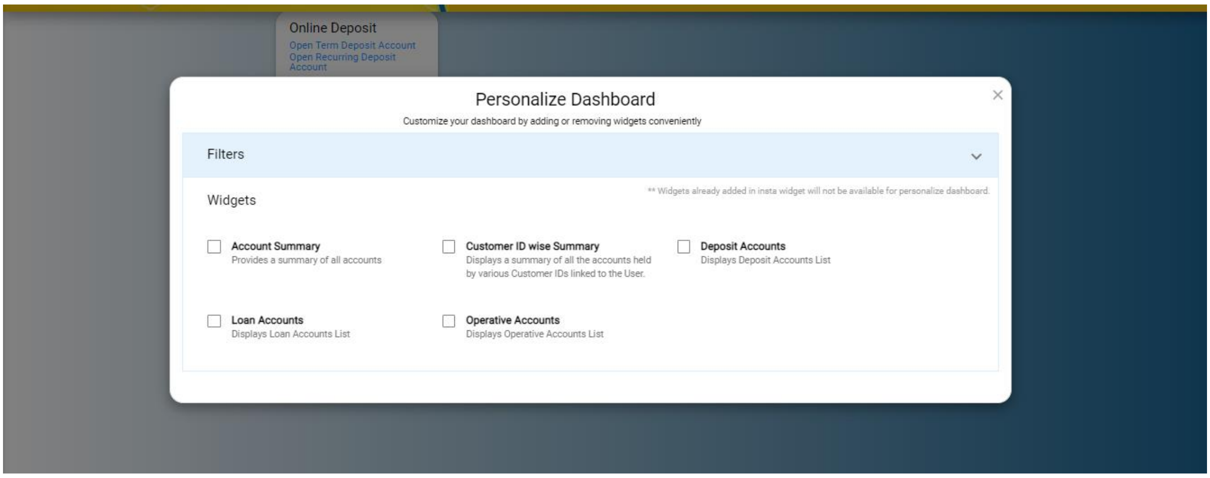
User can select the favorites from the drop-down and add the same; user can also remove the favorite's link added earlier.

5. Personalize Dashboard

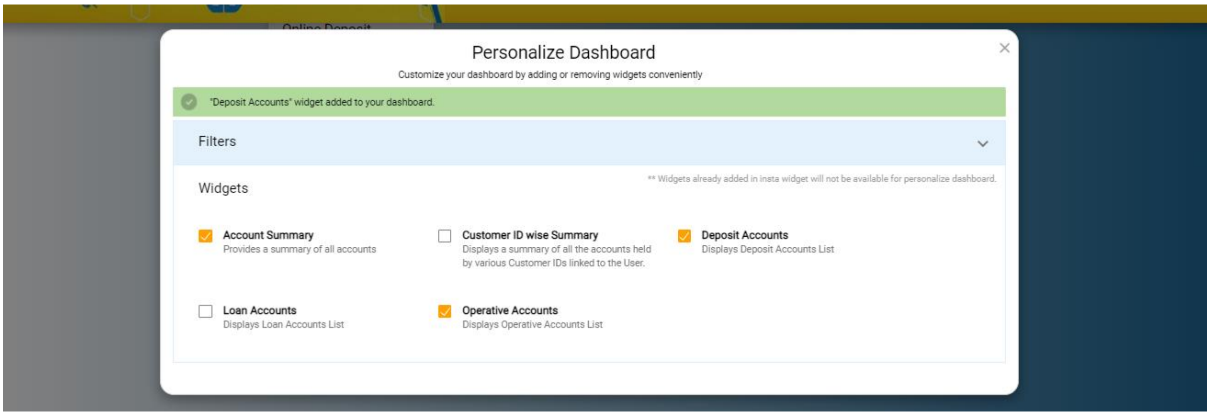
Personalize dashboard is used to personalize the dashboard as per user choice; USER can design his/her dashboard according to the need or choice/requirement.



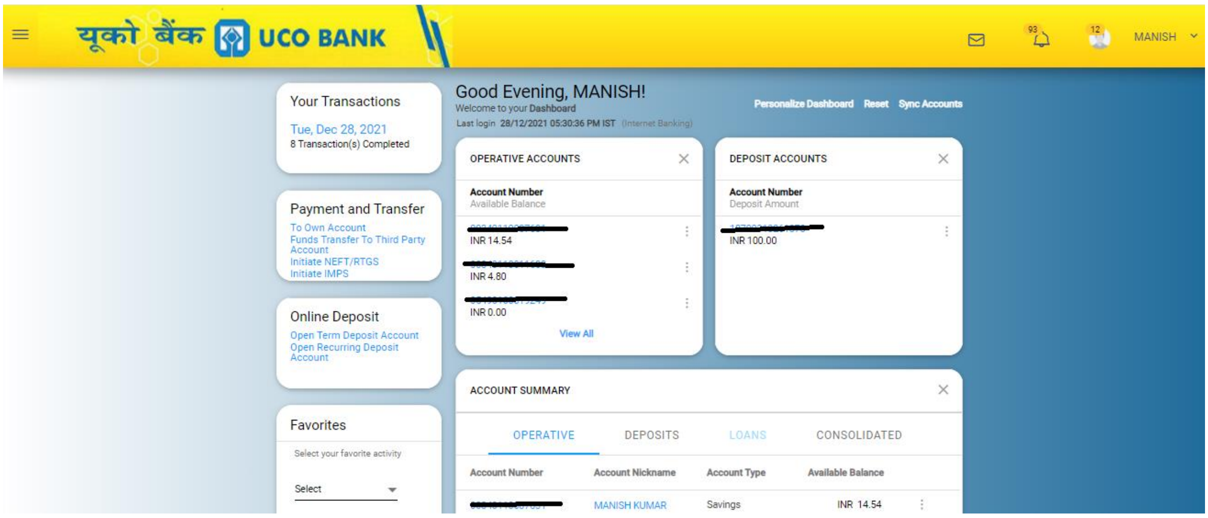
By default, five widgets are available to the user. User can select minimum three widgets that will load by default once logged in as per the screen resolution and space.



Once widgets selected by the users, said widgets will be loaded to the dashboard. After selection of widgets, user has to click on cross (X) button to land on dashboard page.

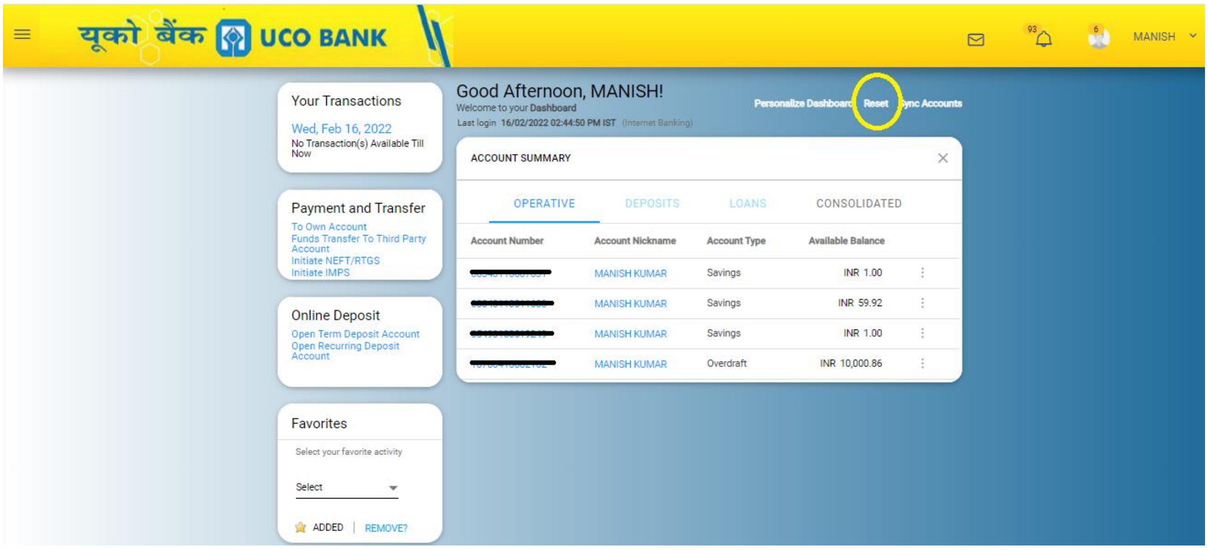


Dashboard after loading of widgets from personalized Dashboard

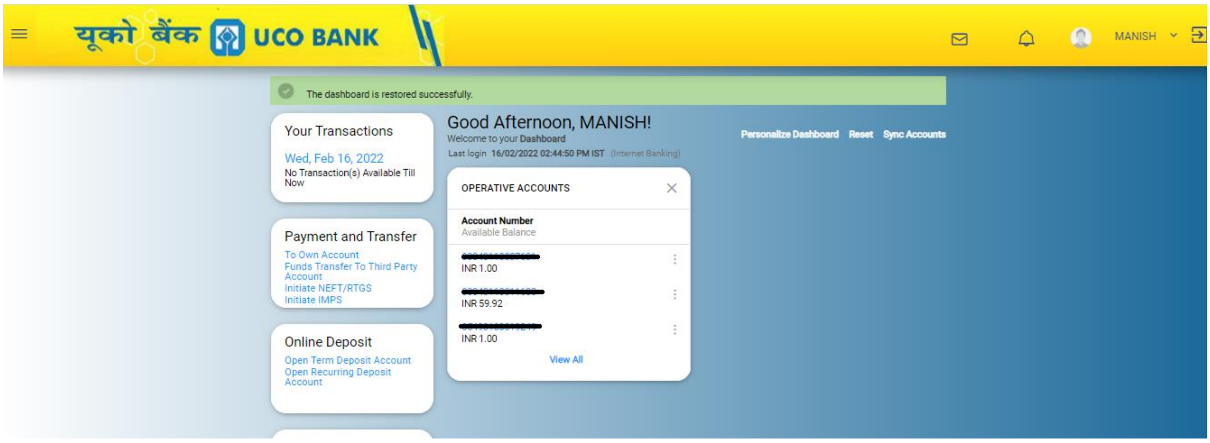


6. Reset

There is a **reset** button in the dashboard and which is used to change or convert the personalized dashboard to application default dashboard. In application default dashboard, summary of operative accounts will show in the dashboard.



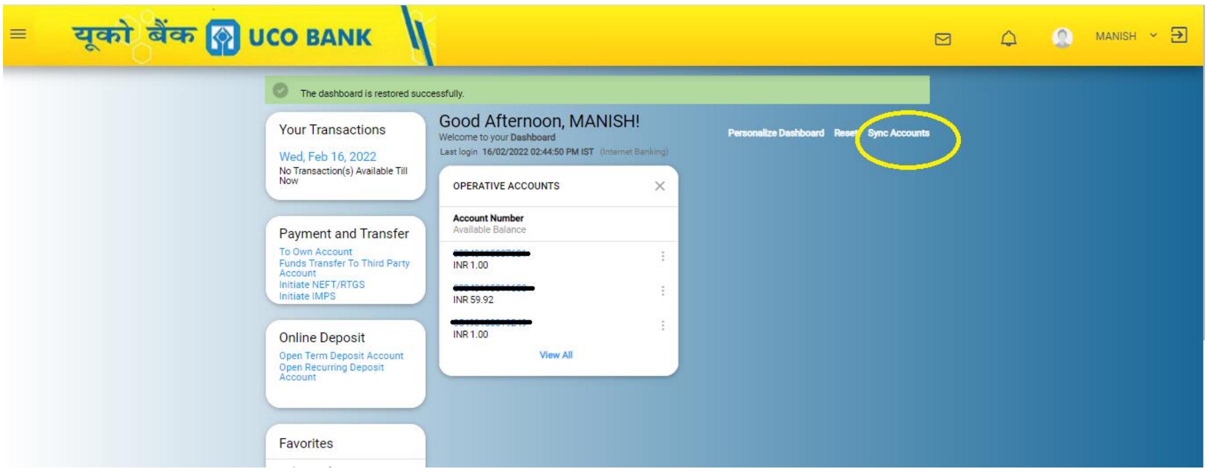
(Before reset)



(After reset)

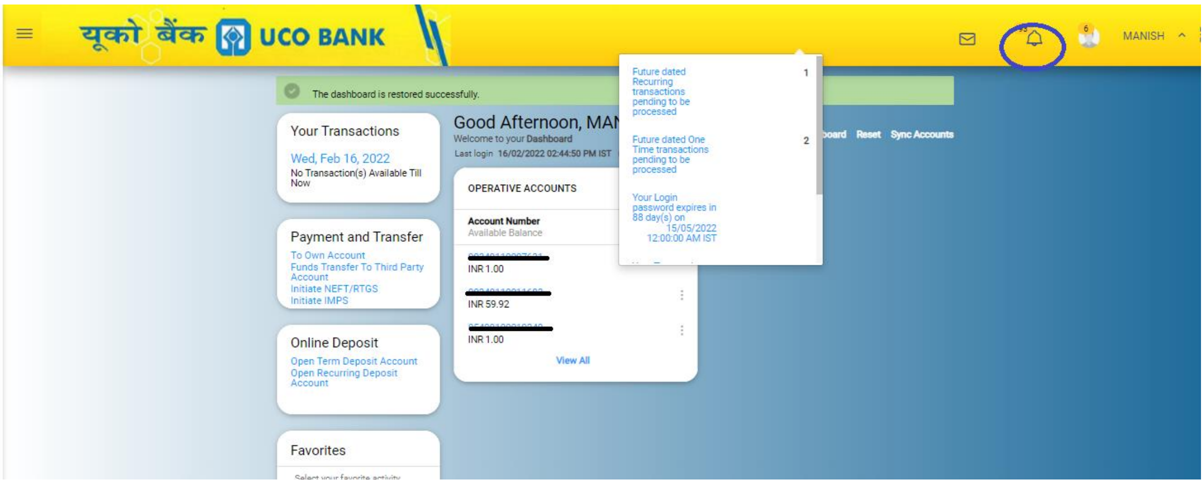
7. **Sync Accounts**

   Sync accounts button is used to sync or refresh the account which is opened but not showing or reflecting in the account list.



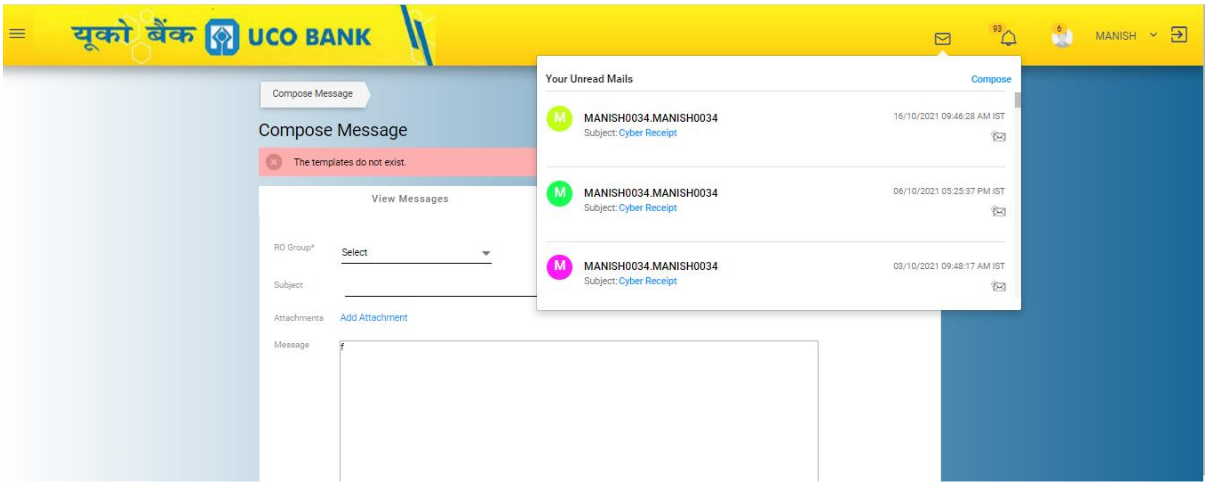
8. **Notification (Bell Icon)**

   Bell icon is used to show the notification related to user activities like number of future dated recuring transactions and schedule transactions, beneficiary under cooling period and date of expiry of login and transaction password.



9. Mail Box

Mail box is used to compose the mail or message and view the unread mails.



10. Menu

Three horizontal lines shown in the left upper corner of the dashboard which is basically a hamburger menus which consists of accounts, my accounts, dashboard, transactions and Investments, General Services, Tax challans in more menu options.
